December 21, 2010

To Whom It May Concern:

Thank you. We appreciate the confidence you have placed in our business and the nutritional supplements we manufacture. We would like to take this opportunity to let you know about some exciting new changes that we are making in 2011.

While Dr. Wong has been extremely happy with the results of Zymessence®, he is still receiving consumer inquiries relating to the size of the Zymessence® tablet. As you all know, Dr. Wong is constantly listening to our customers and helping them to better health. So, he feels that he can help more people by reformulating the Zymessence® blend. We will be doing this by continuing with our existing tried-and-true formula and altering it slightly by:

1. Increasing the amount of all the enzymes currently in the blend. Thereby making it stronger in enzyme activity units.
2. Putting the blend in a capsule. Thereby making it more convenient for folks to take.
3. Using new pharmaceutical technology that allows us to create an enteric matrix without having to use such a large amount of starches in order to protect the enzymes. This new pharmaceutical enteric material allows it to enteric coat the enzyme powder while taking up much less volume than the older enteric method. Thus allowing the product to be smaller in bulk and allows it to be put in a capsule.

We were hoping to have the new formula available the first of January but manufacturing scheduling has made it such that this timetable is not attainable. So, unfortunately, the Zymessence® will be temporarily out of stock. At this time, we anticipate having the New & Improved Zymessence® product completed and out of manufacturing by the end of January 2011. Please accept my apologies for the inconvenience. As soon as we have it back in stock we will let you know.

Be well,

Michele Wong
